What distinguishes AURUM VISION from other flooring?

Special 3D® Surface Structure

With 3D®, there are at least three gloss levels across the surface of each board. Take a solid oak plank - sawn, finished, installed and lovingly oiled. Now imagine it has been in place for 30 years. Wear and indentations have added character and beauty. It looks better now than it did when it was installed decades ago. This is the stunning impression of Aurum Vision.

High Abrasion Resistance Class AC5

Aurum Vision has the highest wear resistance rating of AC5 - designed for heavy residential and commercial flooring. Aurum Vision is the natural choice for busy, high-traffic homes, with active children and pets.

Innovative 5G Express Click Installation

The 5G Express Click system allows for fast and easy laying based on a single action installation method. The boards are locked on the long side with a traditional angling method, however on the short side, the 5G locking system enables simple and fast installation by vertical snap, without the need for any tools.
